Clark County Wetlands Park spans 2,900 acres that includes a 210 acre Nature Preserve, trailheads, wildlife habitat, and opportunities for scientific and educational programs for all ages. Over 300 species of bird and 70 species of mammals and reptiles are found in this "oasis" of our desert.

Our one hour tour will be led by a park naturalist. We will learn about the history of the park, explore the various fauna and observe the resident animals and their habitat. This will be a low impact walking tour over a paved walkway and will be approximately one mile in length. It is recommended participants wear comfortable walking shoes and dress for outdoor weather.
